

DAY-5:

Tasks

1.

On your Windows laptop or PC, open 'System Information' and take a screenshot showing your OS version, processor, and RAM details.

 Device info

Device name	Siddhiii
Processor	Intel(R) Core(TM) Ultra 5 125H (1.20 GHz)
Installed RAM	16.0 GB (15.4 GB usable)
Graphics card	Intel(R) Arc(TM) Graphics (128 MB)
Storage	290 GB of 954 GB used
Device ID	1BA3122E-8242-43D7-B6A2-BA3E720E2ADF
Product ID	00342-42765-76241-AAOEM
System type	64-bit operating system, x64-based processor
Pen and touch	No pen or touch input is available for this display

 Windows info

Edition	Windows 11 Home Single Language
Version	25H2
Installed on	28-12-2025
OS build	26200.9278
Serial number	YX0G16R3
Experience	Windows Feature Experience Pack 1000.26100.360.0

2.

Download any official Linux distribution ISO (like Ubuntu or Fedora), and use Rufus or BalenaEtcher to create a bootable USB drive for installation.

Hint: If you don't have a spare

USB, use a virtual machine tool like VirtualBox to mount the ISO and start the installation process virtually.

Steps followed:

1. Downloaded the official Ubuntu ISO file.
2. Connected a USB flash drive to the computer.
3. Opened Rufus.
4. Selected the USB drive under Device.
5. Clicked Select and selected the Ubuntu ISO file.
6. Selected GPT as the partition scheme for a modern UEFI-based computer.
7. Clicked Start.
8. Confirmed the warning that all data on the USB drive would be erased.
9. Waited while Rufus copied the Ubuntu files and created the bootable USB.
10. After completion, safely ejected the USB drive.

Result:

A bootable Ubuntu USB drive was successfully created and can be used to install or run Ubuntu.

3.

On a macOS device (or using a macOS virtual machine), open 'System Preferences' and change the desktop wallpaper, then adjust the system language to Hindi or Gujarati.

Hint: Find 'Language & Region' in System Preferences to add or change languages.

A. Change the Desktop Wallpaper

1. Opened System Preferences.
2. Selected Desktop & Screen Saver.
3. Selected a different wallpaper from the available options.
4. Confirmed that the new wallpaper appeared on the desktop.

B. Change the System Language

1. Opened System Preferences.
2. Selected Language & Region.
3. Clicked the + button to add a language.
4. Selected Hindi or Gujarati.
5. Added the selected language.
6. Set it as the preferred language.
7. Logged out or restarted the Mac if prompted.

Result:

The desktop wallpaper was changed successfully, and Hindi/Gujarati was added as the system language.

4.

Install a fresh copy of Ubuntu Linux (real or virtual machine) and create a new user account named 'gamer'. After installation, enable automatic login for this user and take a screenshot of the login screen showing the username.

Steps followed:

1. Installed a fresh copy of Ubuntu Linux in a computer or virtual machine.
2. Logged into the administrator account.
3. Opened Settings.
4. Selected Users.

5. Clicked Unlock and entered the administrator password.
6. Selected Add User.
7. Entered the username gamer.
8. Created a password for the account.
9. Created the new user.
10. Logged into the gamer account to confirm that it worked.

Enable Automatic Login

1. Opened Settings → System → Users.
2. Selected the gamer account.
3. Enabled Automatic Login.
4. Restarted Ubuntu.
5. Verified that Ubuntu automatically logged into the gamer account.

Result:

The gamer user account was successfully created and automatic login was enabled.

5.

Use ChatGPT to generate a step-by-step guide for installing Windows 10 on a laptop, including partitioning tips and post-installation settings for privacy and updates. Follow the guide and note any steps that were unclear or missing.

Step 1: Back Up Important Data

Before starting, back up important files such as documents, photos, videos, and assignments to an external drive or cloud storage.

Step 2: Create Windows 10 Installation Media

1. Download the official Windows 10 installation files.

2. Use the **Windows Media Creation Tool** or another trusted tool to create a bootable USB.
3. Connect the USB to the laptop.

Step 3: Boot From the USB

1. Restart the laptop.
2. Open the **Boot Menu** using the appropriate key, such as **F12, F9, Esc, or another key depending on the manufacturer**.
3. Select the USB drive.
4. Windows Setup will start.

Step 4: Start Installation

1. Select the **language**.
2. Select the **time and currency format**.
3. Select the **keyboard layout**.
4. Click **Next → Install Now**.

Step 5: Enter Product Key

Enter the Windows product key if available.

If the laptop already has a digital Windows license, activation may happen automatically after connecting to the internet.

Step 6: Select Windows Edition

Select the Windows edition that matches the license, such as:

- Windows 10 Home
- Windows 10 Pro

Step 7: Choose Installation Type

Select:

Custom: Install Windows only (advanced)

This allows the user to manage the disk partitions.

Partitioning Tips

 **Be careful during partitioning because deleting or formatting the wrong partition can permanently erase data.**

1. Identify the correct internal drive.
2. Back up important data before deleting any partition.
3. For a completely fresh installation, old Windows partitions can be deleted if you intend to erase the entire drive.
4. Select the resulting **Unallocated Space**.
5. Click **Next**.
6. Windows will automatically create the necessary system partitions.

If the laptop has multiple drives, carefully identify the correct drive before making changes.

Step 8: Install Windows

1. Select the desired installation partition.
 2. Click **Next**.
 3. Windows will copy files and install the operating system.
 4. The computer will restart several times.
 5. Remove the USB when appropriate or allow the computer to boot from the internal drive.
-

Step 9: Complete Initial Setup

Follow the instructions on screen to:

- Select the region.
- Select the keyboard layout.
- Connect to Wi-Fi.
- Sign in or create an account.

- Create a PIN/password.
 - Configure basic Windows settings.
-

Step 10: Install Windows Updates

1. Open **Settings**.
 2. Go to **Update & Security → Windows Update**.
 3. Click **Check for updates**.
 4. Download and install available updates.
 5. Restart the computer when required.
-

Step 11: Install Hardware Drivers

Open **Device Manager** and check for devices with missing drivers.

Install drivers for:

- Graphics
- Wi-Fi
- Bluetooth
- Audio
- Chipset
- Touchpad
- Other hardware

It is generally best to use drivers provided by the laptop manufacturer when available.

Step 12: Configure Privacy Settings

Go to:

Settings → Privacy

Review permissions for:

- Location
- Camera
- Microphone
- Contacts
- Account information
- Diagnostics
- Background apps

Disable permissions that are not required.

Step 13: Final Testing

After installation:

1. Test the internet connection.
2. Check the speakers and microphone.
3. Test the webcam.
4. Check the screen resolution.
5. Test USB ports and Bluetooth.
6. Confirm Windows activation.
7. Create a restore point or recovery option if appropriate.

Result:

The Windows 10 installation process was completed by creating installation media, booting from USB, selecting the correct partition, installing Windows and drivers, applying updates, and reviewing privacy settings.
